

International Accolade for VITAL SSON Business Resilience Impact Award (Silver)!

SSON recognises the best in class public and private sector shared services organisations.

Business Resilience Impact Award focuses on the crisis management, risk management and business continuity planning strategy to secure long-term stability in shared services.

The awards represent the highest level of recognition for the impact shared services have on enterprise, and judges are from the private sectors. The awards are conferred by SSON, the world's largest industry organisation for shared services with a global community of about 160,000 members.

VITAL's work was also recognised by the industry for the Diversity & Inclusion Impact Award (Finalist) which aims to identify business impact of a culture of inclusion across the full spectrum of diversity in shared services.
